Company profile

ALUMINCO, situated in Inofita (40km from Athens & 70km of the int. airport EL. BENIZELOS), Viotia, is the first company of this sector that, since its establishment, begun the production of items made of cast aluminium on traditional patterns. Today, with 28 years of experience, our company has evolved to an integrated vertical aluminium industry. The production center includes integrated processing units, units of powder coating, assembling, finishing, packaging and storage.

ALUMINCO offers aluminium-based modern architectural and constructive solutions, which include:

- A complete series of tilt & turn sliding and thermal break aluminium systems.
- Several series of on aluminium panels for any architectural and building need, emphasizing on aesthetics, functionality and safety.
- Safety doors and reinforced doors for main entrances of any building. Available in traditional or modern styles, in a large variety of designs and colors.
- Railing systems for balconies, verandahs and stairs. In traditional and modern designs, of cast aluminium or inox type combined with polycarbonate panels.
- Outdoor systems, such as pergolas, patios, entrance canopies, yards and lighting, offering integrated solutions for buildings of high demands.

Our exporting experience to more than 60 countries throughout the world, keeps ALUMINCO dedicated to product research and development, satisfying the qualitative, aesthetic and functional needs of the demanding and rapidly developing markets.

The powder coating procedure is based on QUALICOAT specifications for SEASIDE CLASS; our company conforms to the quality system ISO 9001 and the system of environmental management ISO 9014.

All aluminium and railing systems are designed, developed and tested by the department of Research & Development and then are certified by recognized institutes and international organizations, such as IFT Rosenheim of Germany, Instituto Giordano of Italy, EKANAL (Greek Center of Aluminium Development of Greece), etc.

Profil de la Société

ALUMINCO SA, installée à Inofyta Viotias (40km d' Athènes et 70km de l'aéroport international d' Athènes EL. VENIZELOS), est la première société en Grèce qui a lancé la fabrication de produits d'aluminium moulé sur des motifs traditionnels.

Aujourd' hui, avec plus de 28 ans d'expérience, la société s'est évoluée en une industrie d'aluminium verticale grâce au développement de sa capacité de production: peinture électrostatique (QUALICOAT, SEASIDE CLASS), unité d'assemblage, unité d'emballage, entrepôt de stockage.

Aluminco SA, vous propose de solutions d' architectures adaptées aux nouvelles tendances des marchés mondiaux:

- Une gamme variée de systèmes de portes et fenêtres à pont de rupture thermique ou froid (ouvrant, oscillo - battant, coulissant levant).
- Un grand nombre de panneaux de portes en aluminium répondant aux besoins en esthétique, en fonctionnalité et en sécurité.
- Portes blindées pour les entrées de bâtiments privés ou professionnels, disponibles en une grande variété de dessins et de couleurs.
- Garde-corps pour balcons, terrasses et rampants extérieurs ou intérieurs, disponibles en une gamme

variée de dessins (modernes ou classiques) en aluminium moulé ou en profilé d' aluminium anodisé/aspect inox pouvant se combiner avec des plaques de polycarbonates.

- Systèmes de pergola (modernes ou classiques), des auvents pour les portes d' entrée, des postes d' éclairage en une large gamme de dessins et un ensemble de meubles de jardin vous offrant des solutions innombrables pour les édifices privées ou professionnelles.

Son activité d' exportation à plus de 60 pays mondialement, incite la société à maintenir son rythme actuel en recherche et développement afin de continuer à répondre aux besoins de marchés en qualité, esthétique et fonctionnalité.

Notre société est certifiée par ISO 9001 en système de qualité et par ISO 9014 en gestion de l'environnement.

Tous nos systèmes de menuiserie et de garde-corps sont conçus, dessinés, développés et testés par notre équipe de R&D.

Toutes nos certifications nous sont remises par des instituts internationaux compétents tels que IFT Rosenheim en Allemagne, Insituto Giordano en Italie, EKANAL en Grèce.

Shading Systems

ALUMINCO Shading Systems include a complete range of designs to suit all types of patios and pergola constructions. Options include classic or modern design, with or without top cover. They save energy and they protect the buildings from solar radiation by creating the ideal conditions in interior and public spaces.

Systèmes d'ombrer

Pluralité de dessins modernes et traditionnels offrent une protection solaire, une haute esthétique et une économie d'énergie importante.

Pergolas

The unquestionable quality of aluminium pergolas guarantees great resistance in hard weather conditions. Suitable for any space, they are easily assembled and installed and require no particular maintenance. Powder coating is combined with the standards of seaside class for protection from salinity. They are available in a variety of colors, in special colors and wood imitation shades.

Canopies

Entrance canopies are the ideal solution for the protection of main entrances of houses and offices from rain and solar radiation. They are made of pure aluminium, powder coated, in traditional and modern designs. They can be covered with crystal or compact polycarbonate panels. They are easily placed, without intervening in the building architecture and are available in four exquisite designs, adding an excellent aesthetic and functional result. Available in standard dimensions: 100, 120, 140, 180 and 220cm, depth 100cm depending on the design and thickness required.

Pergolas

La qualité incontestable de la construction de la pergola en aluminium garantit une haute résistance dans le temps. Elle peut être montée à tous les endroits, puisqu'elle est assemblée et installée facilement et ne nécessite aucun entretien particulier. La peinture est électrostatique (traitement spécial «Seaside Class»). Disponible dans une grande variété de couleurs, RAL et teintes bois.

Auvents

Les auvents sont la solution idéale pour protéger les portes d'entrée des maisons et des bâtiments de société par la pluie et le soleil. Ils sont fabriqués en aluminium et ils existent en dessins traditionnels et modernes. L'usage de vitrage ou de polycarbonate est en option. Ils sont fixés facilement sans interférer à l'architecture du bâtiment. Disponibles en panneaux de 100, 120, 140, 180 et 220 cm et épaisseur 100cm.

Classic Traditional

Traditional pergolas will bring the air of the Mediterranean to any house or building. They are resistant to all weather conditions, easy to assemble and maintenance free. Powder coating finishes are available in many colors of seaside class quality and in several wood imitation shades.

La pergola traditionnelle peut être posée à tout type de bâtiment, donnant un aspect classique. Elle résiste aux conditions atmosphériques et elle facilement assemblée et installée, ne nécessitant aucun entretien particulier. Grâce à la peinture électrostatique, une haute protection contre la salinité est atteinte. La pergola traditionnelle d'ALUMINCO est disponible en tous les coloris RAL et teintes bois.

Classic - Classique

Designed in an identical line with that
of classic wood pergolas.

Dessinée en ligne identique à celle de
la pergola classique en bois.

Classic Traditional

With polycarbonate sheets

Traditional pergolas may be combined with polycarbonate panels that offer additional protection from various weather conditions. They offer style and comfort to any outdoor living area, guaranteed by Lexan® polycarbonate sheets, which are officially distributed in Greece by ALUMINCO.

Avec panneaux en polycarbonate

Des panneaux en polycarbonate peuvent se fixer sur la pergola traditionnelle, ce qui accentue la protection contre les conditions atmosphériques. ALUMINCO, est le distributeur officiel de Lexan® en Grèce.

Classic - With polycarbonate sheets
Classique - Avec panneaux en polycarbonate

Ceiling support system with polycarbonate sheet.

Système de support d'auvent avec panneaux en polycarbonate.

Classic Traditional

Traditional - With canvas roofing

The combination of traditional pergola with canvas roofing offers additional protection and shading, lending simultaneously the sense of noble, particularly when combined with wood imitation shades. This solution is ideal for applications intended for traditional summerhouses, giving the charm of country style.

Pergola traditionnelle en toile

L'usage de toile accentue la protection solaire. Sa combinaison avec des teintes bois donne un résultat d'esthétique exceptionnel. Solution idéale pour de maisons de campagne et des maisons de style traditionnel offrant la chaleur requise par la tradition.

Classic - With canvas roofing
Classique - En toile

An inclined crossbar is added, in case it is supported on the wall.

Barre avec une inclinaison en cas d'appui sur le mur.

Modern

A modern version of aluminium pergolas in simple and minimal line, suitable for buildings with the concept "less is more". Available in several colors, with seaside class powder coating and indisputable high construction quality. It is the ideal architectural solution for spaces surrounding modern houses.

Une proposition moderne pour les pergolas en aluminium en lignes simples et distinctes s'adaptant aux bâtiments de hautes demandes et spécifications architecturales. Disponible en une grande variété de couleurs (peinture électrostatif «Seaside Class»). Il s'agit de la solution idéale pour des maisons d'architecture contemporaine.

Modern - Moderne

Easy and fast construction. Special joints for the installation of transversal purlins on crossbars without further processing or joints.

Facile et rapide façon de construction. Connecteurs spéciaux pour l'installation de pannes transverses sur les barres sans autre traitement ou assemblage.

Modern

With polycarbonate sheets

Polycarbonate panels may be fitted on modern pergolas, adding protection from weather conditions. Ideal for gardens, swimming pools, roof gardens, etc. adding style and particular aesthetics. Lexan® polycarbonate sheets officially distributed in Greece by ALUMINCO, make safe and impermeable pergolas.

Moderne avec panneaux en polycarbonate

La pergola moderne peut également accepter des panneaux en polycarbonate favorisant la protection contre les conditions atmosphériques. Application idéal en jardins, en piscines, en terrasses etc. L' utilisation des panneaux en polycarbonate Lexan® favorise l' étanchéité. (ALUMINCO est le distributeur officiel de Lexan® en Grèce)

Modern - With polycarbonate sheet
Moderne - Avec panneaux en polycarbonate

With canvas roofing

Another version of pergola, featuring a soft line of canvas on the fixed aluminium structure. The combination of modern pergolas with canvas offer additional shading to balconies, gardens etc.

Moderne pergola en toile

L' usage de toile sur la pergola moderne favorise l' ombre en jardins, balcons ou en espaces professionnels.

Modern - With canvas roofing
Moderne - En toile

Ceiling support system with polycarbonate sheet.

Système de support d'auvent avec panneaux en polycarbonate.

The use of woven canvas offers shading and a modern or traditional result, depending on the desirable style.

L'emploi de toile tricotée accentue l'ombrage d'ombrage avec un effet moderne ou traditionnel, selon le style que vous désirez.

Modern

With fixed louver blades

Class meets quality. One more option of the modern pergola, where fixed louver blades may be used in certain parts, giving originality to modern design. Highly recommended for those seeking things out of the ordinary.

Aves stores vénitiens fixés

L'élégance rencontre la qualité. Une autre option pour la pergola moderne où les stores vénitiens peuvent être utilisés à certaines parties de la structure, créant des combinaisons originales. Elle est la solution parfaite d'architecture pour une conception nouvelle et avancée.

With movable louver blades

The technological evolution in shading systems! An exceptional modern solution that was designed having two things in mind, functionality and high aesthetics. The pergola can be motorized, providing the best degree of sun-shading. It can be easily operated by means of a remote control.

Avec stores vénitiens mouvants

L'évolution technologique dans les systèmes d'ombrer! Une solution efficace et esthétique. L'inclinaison du profilé d'auvent est ajustée mécaniquement. C'est une structure qui réinvente esthétiquement l'architecture du bâtiment.

Modern - With fixed louver blades

Optional use of electrical mechanism.

Option d'un mécanisme électrique

Plastic axle (Polyamide 6) offers stability, resistance and noiseless movement.

L'axe plastique (Nylon 6) offre stabilité, résistance et mouvement silencieux.

Pioneer gutter design that collects rainwater leading it to the column profile. It has been designed to be installed only to one direction or even around the construction.

Une conception innovatrice de la gouttière qui recueille l'eau de pluie, la conduisant au profil de la colonne. Elle est dessinée pour l'installation vers une seule direction, ou autour la construction.

Entrance Canopies

Entrance canopies are an ideal solution for the protection of main entrances and professional spaces from rain and sun. They are made of pure aluminium, powder coated, in traditional and modern designs. They are available with solid polycarbonate Lexan® sheets. They are easily installed without intervening in the building's architecture, available in four beautiful designs, providing an excellent aesthetic and functional result.

Available in standard dimensions (100, 120, 140, 180 and 220cm - depth 100cm depending on the design and thickness of the construction).

Auvents pour les portes d'entrée

Ces auvents sont la solution idéale pour protéger les portes d'entrée des maisons et des bâtiments de société par la pluie et le soleil. Ils sont fabriqués en aluminium et sont disponibles en dessins traditionnels et modernes et de panneaux en polycarbonate Lexan®. Ils sont fixés facilement sans interférer à l'architecture du bâtiment. Quatre dessins offrent un excellent effet esthétique et fonctionnel.

Disponible en panneaux de 100, 120, 140, 180 et 220 cm et épaisseur 100cm.
